**Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)**  
(application filed on or after May 29, 2000)

The patent term adjustment to date is 136 days. If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the term adjustment will be 136 days.

If a continued prosecution application (CPA) was filed in the above-identified application, the filing date that determines patent term adjustment is the filing date of the most recent CPA.

## Notice of Fee Increase on October 1, 2002

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after October 1, 2002, then the amount due may be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on October 1, 2002. See Revision of Patent and Trademark Fees for Fiscal Year 2003; Notice of Proposed Rulemaking, 67 Fed. Reg. 30634, 30636 (May 7, 2002). Although a change to the amount of the publication fee is not currently proposed for October 2002, if the issue fee or publication fee is to be paid on or after October 1, 2002, applicant should check the USPTO web site for the current fees before submitting the payment. The USPTO Internet address for the fee schedule is: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of the fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after October 1, 2002 (or mailed with a certificate of mailing on or after October 1, 2002), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Effective October 1, 2002, 37 CFR 1.18 is proposed to be revised to change the patent issue fees as set forth below. As stated above, the final fees may be a different amount, and applicant should check the web site given above when paying the fee.

(a) Issue fee for issuing each original or reissue patent, except a design or plant patent:

By a small entity (Sec. 1.27(a))--\$655.00

By other than a small entity--\$1,310.00

(b) Issue fee for issuing a design patent:

By a small entity (Sec. 1.27(a))--\$235.00

By other than a small entity--\$470.00

(c) Issue fee for issuing a plant patent:

By a small entity (Sec. 1.27(a))--\$315.00

By other than a small entity--\$630.00

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Stephen Jensen on July 19, 2002.

The application has been amended as follows:

In the specification, the following sentence was inserted as the first sentence of the specification (page 1), to properly set forth the priority claim:

 -- This application is a continuation of application U.S. Serial No. 09/441,736, filed November 17, 1999, now U.S. Patent No. 6,206,830, which is a continuation of application U.S. Serial No. 09/102,131, filed June 22, 1998, now U.S. Patent No. 6,036,642, which is a continuation of application U.S. Serial No. 08/479,918, filed June 7, 1995, now U.S. Patent No. 5,769,785, which is a continuation of application U.S. Serial No. 08/249,690, filed May 26, 1994, now U.S. Patent No. 5,482,036, which is a continuation of application U.S. Serial No. 07/666,060, filed March 7, 1991, now abandoned.

In the claims

Claims 1 - 40 were canceled.

The following is an examiner's statement of reasons for allowance: As detailed in the preliminary amendment filed June 7, 2002, Applicant requested a personal interview

prior to examination of the application to allow discussion of any potential objections or rejections to the claims. Several such problems were identified during the interview (see Interview Summary, paper #8) and have been addressed by filing of the preliminary amendment (paper #10) and terminal disclaimer (paper #12).

The claims of the instant application variously recite: closed loop adaptive system (algorithm); adjusts itself (adjusting) to optimize; employs (executes) an adaptive algorithm; executes (effected by) a least squares algorithm; adjusts coefficients ... based on an output ... to optimize; an algorithm that responds to at least one error signal; a signal and an estimate ... are compared in order to produce; adjusts its own transfer function using a least squares algorithm. These phrases clearly define, in various ways, when taken in context of the additional claim limitations, closed loop or self-optimizing pulse oximetry systems and methods.

The prior art teaches some forms of adaptive techniques in systems requiring noise reduction, see Yelderman and Widrow ("ECG Enhancement ...") who contemplate use of adaptive cancellation in ECG monitoring during electrosurgery, McCool et al. (USPN 4,243,935) who teach an adaptive detector for use in spectral analysis and in particular for improving system detection performance for narrow band signals of interest, and Griffith (USPN 4,858,199) who teaches a noise cancellation method and apparatus for analysis of seismic data. Further, others teach open loop adaptive systems, see Conlon et al. (USPN 4,960,126) who teach an ECG synchronized pulse oximeter. However, none of the prior art, either alone or in combination, teaches or

1

suggests pulse oximetry systems and methods that include closed loop adaptive systems or self-optimizing systems, as set forth in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
